

GM – POWERTRAIN

"The General Motor Powertrain centre of Turin will work together with the group's other centres in North and South America. Turin is the ideal place, with quality engineering skills, to develop diesel engines and has great growth opportunities" (Tom Stephens, deputy president Gm Powertrain).

GM Powertrain in Piedmont

With a 10 million investment, in June 2005 General Motors set up GM Powertrain (www.gm.com/europe) in Turin, making it the company's European headquarters. The new centre can count on about 130 engineers and diesel engine specialists, with employment growth forecast of 50% within the next two years.

GM Powertrain in the world

At the worldwide level, GM Powertrain has 88 design and manufacturing centres in 14 countries with over 59,000 employees for total daily production of more than 36,000 engines and 32,000 transmissions.
