

## Aerospace & Defense Meetings Torino

### Aerospace & Defense Meetings Torino

28-29 October 2009 Turin, Italy

#### Turin, the aerospace capital

Aerospace & Defense Meetings, the first international convention dedicated to the aerospace and defense industry to be staged in Italy, will be back in Turin on 28-29 October 2009.

The choice of Turin as a venue for the second time confirms the technological excellence and the competitive position of the Italian aerospace industries, especially those from Piemonte. Launched in 2008 by the Torino Chamber of Commerce and organised by the Piemonte Agency in collaboration with BCI Business Conventions International, Piedmont Aerospace District, Piemonte Regional Government, and AIAD (Italian Industries Federation for Aerospace, Defence and Security) the event will be held at the Oval Lingotto. Aerospace & Defense Meetings will become biannual from 2011 onwards, rotating with the Aeromart in Toulouse.

The convention is structured around:

- B2B Meetings, to build up targeted and customised business opportunities with over 350 companies from all over the world
- A scientific program including conferences, technical seminars, workshops, and "Do Business With" sessions.

Companies from Italy, Europe, Russia, Canada, United States, Mexico, Israel, China, India, Japan and others will join Aerospace & Defense Meetings 2009. Many important manufacturers have already confirmed their participation as buyers.

Among the aerospace clusters that will be present are: Ile de France, Rhône Alpes, Aerospace Valley, Baden Württemberg, and from Italy the ones in Naples, Rome, Brindisi and Varese.

The main conference of the scientific program is supported by SAE International and will be focused on the Green Aircraft and on the most updated technologies for the sector as an environmental strategic priority of the European project "Clean Sky".

A program of side lectures just before and after the event turns the venue into an "aerospace week" by dedicating 2 days to some of the most interesting areas of the sector: China, the Aerospace Valley French cluster, India and Russia.

Aerospace & Defence Meetings is organised within Torino Piemonte Aerospace project, a preferential lane to meet and start business with aerospace companies from Torino-Piemonte.
