

PARTNERING FOR INNOVATION

**MAY 16–17, 2011  
TURIN, ITALY**

**TORINO INCONTRA CONFERENCE CENTRE**

**APPLY TO PRESENT NOW!**  
Deadline: March 25, 2011

#### About the conference

EuroMedtech™ 2011 brings together the myriad sectors of the medtech industry, creating a forum dedicated to forging partnerships between large companies and innovators, public and private companies and investors, institutes and industry. EuroMedtech caters to companies involved in all parts of the advanced medical technology industry, from those serving mainline therapeutic categories such as orthopedics and cardiovascular, through diagnostics, imaging and eHealth, to those involved in platform technologies such as biomaterials and regenerative medicine. Also attending are companies serving the industry, such as manufacturers, law firms, CROs and distributors.

The event features EBD Group's sophisticated, web-based partnering system, partneringONE®, the life science leading conference networking solution that enables delegates to efficiently mine a large pool of potential partners and pre-arrange private one-to-one meetings.

#### Apply to present

EuroMedtech also features 15-minute presentations of medical technology innovations by start-ups and established firms, insightful panel discussions on industry developments and business development trends, and opportunities for informal networking.

We invite you to join us in Turin for Europe's most intensely productive advanced medical technology event of the year.
