9.35% at the end of July 2014.

(FY 2012/2013) USD 26.0 billion, and recorded USD 18.7 billion during 9 months of the FY 2013/14.

(FY 2012/2013) USD 57.5 billion, and recorded USD 43.9 billion during 9 months of the FY 2013/14.
Reforms on the legislative level

- Considering the challenges the government faces in restoring the pace of growth, an imperative legal and policies reforms were highly required.

- The legislative amendments include trade & industry law, labour law and investment law to allow for protecting investors, facilitating the process of licenses issuing.

- Alongside with legislative amendments, new legislation are being introduced such as the new energy code to attract FDI in the Renewable Energy Sector, as it identifies the feed-in Tariff and pricing system, and most important it ends the problematic of the sovereign guarantees demanded by the investor from a very long time.

- Inline with these efforts, reforms to the tax regime is in the pipeline aiming at removing the distortion in the current code.

- On the other hand the government is still committed with its approach regarding protection of the foreign investment and to extend more preferential incentives for investments operating in Egypt especially to those in the remote areas.

III Target Projects

✓ The development of the entire Suez Canal Corridor

✓ Developing the northwest coast and its desert hinterland
Suez Qanal Corridor

An integrated development project aiming at making from the area from Suez till port Said (almost 150 KM) the major logistics hub for the entire region, expected to attract almost 120 billion US$ within the project time.

East port Said City is one of its basic components as it’s planned to be a Major city with more than 2 million people, with a housing area, industrial hinter zone, in addition to tourism & hotels projects and fishery areas.
Development of Northwest Coast

- A Strategic project for developing the northwest coast and its desert hinterland and the establishment of a new green City “El – alamein”. The area will be linked with the east of the Cairo Alexandria desert highway and also be connected to upper Egypt through a new horizontal network.
- It worth mentioning that the area had the main pillars of economic activities, in addition to the availability of supportive infrastructure, such as the road network, airports and railways, adding that the city can accommodate more than four million people representing untapped business opportunities.
